

The Transparent, Plug n' Play
Printing Solution

Provide superior document handling and print performance for your business.

Bring an end to the hassle and aggravation of managing printer drivers. Prevent the printing problems that too often lead to increased support costs and the unnecessary consumption of time and effort due to large, burdensome native print files or incompatible drivers. Invest in the standalone printing management application that will eliminate the user frustration and loss of work hours when all print jobs come to a halt.

ScrewDrivers is engineered for remote corporate Windows application delivery environments. Whether you're using terminal services, virtualized desktops, or XP Remote Desktop, ScrewDrivers ensures the user that the correct printer and printer attributes are ready to handle the most complex remote printing request.

ScrewDrivers is a simple plug n' play solution.

With configuration and management this simple, you can provide users with problem-free remote desktop printing from any application to any printer, using any printer setting, all while going about your day or doing nothing at all.

Supported Platforms: Citrix XenApp (fka Citrix Presentation Server), Citrix XenDesktop, VMware VDI, Microsoft Windows Terminal Services, Microsoft XP Remote Desktop

- Seamless Print Streaming

Benefits

- Improves operating system stability
- Increases print speed
- Reduces printer support cost and effort
- Boosts productivity and organization by providing seamless printing

"triCerat ScrewDrivers solved all of our Terminal Service printing issues. As an administrator, I truly appreciated triCerat's information on how to easily and silently install the client component. The best reason to choose ScrewDrivers is you will never have to worry about printing conflicts again."

— Lael Black, Pritzker Realty Group, L.P.
